Michelin User Guide

Tyre Inflator

Thank you for purchasing the Michelin Tyre Inflator.

Please read the operating instructions carefully before using your tyre inflator.

Only suitable for vehicles with a negative earth. Check your vehicle owners manual.

- **The inflator is for use with car tyres up to 40psi (do not inflate space saver tyres), and bicycle tyres up to 120psi.**
- **When inflating vehicle tyres, this inflator should ONLY be used for car tyres and bicycle tyres. Low pressure items such as sports balls and small inflatable toys may also be inflated using the adaptors provided.**

Max power requirement during normal use: 7.5 AMPS / 96 WATTS.

WARNING! COMPRESSED AIR CAN BE DANGEROUS

- Never allow children to use this tyre inflator.
- Never leave unattended when running.
- Never over inflate.
- Always use in a safe area away from traffic and other dangers.
- Never run for more than 10 minutes. After each 10 minutes run allow inflator to cool for 10 minutes.

WARNING! ENSURE CORRECT TYRE PRESSURES

- Correct tyre pressure is vital for road safety.
- Under or over inflated tyres can be dangerous.
- Always ensure that regular weekly checks are carried out to the vehicle manufacturers recommended pressures including spare as well other than space saver. Check always before a long journey or if after loading or unloading vehicle.
- Always check pressures in an ambient temperature, never immediately after a long journey.

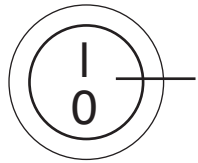
THIS PRODUCT CONFORMS TO THE CRITERIA SET OUT IN PROCEDURE 2 AS DEFINED IN ANNEX VI OF DIRECTIVE 2000/14/EC.

MICHELIN

TYRE INFLATOR

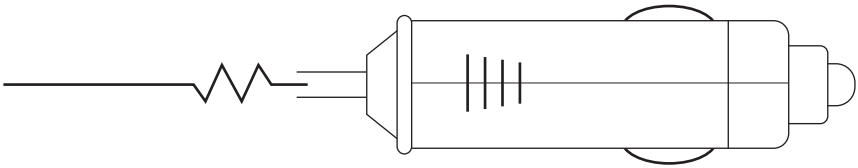
1 - Easy to read display in PSI, BAR or kPa.
2 - Pressure format set button.
3 - On/Off power switch.
4 - 50cm (approx) high pressure air hose.
5 - Rugged chassis.
6 - Deflation valve.
7 - Durable tyre valve connector.
8 - 3.0m (approx) power cord with fused 12v power plug.

TYRE INFLATION



Power Switch (3)

12v Power Plug and Power Cord (9)



1. With power switch (3) in 'O' (off) position, unwind power cord (8) completely from storage compartment, check socket is clean and plug in to the 12v power socket in the vehicle. Wait a few seconds until display shows zero. Press and hold yellow button to reset pressure sensor to zero. To select either PSI/BAR/kPa push button 2 until correct format is displayed in LCD screen.

2. Uncoil high pressure hose and screw tyre valve connector (7) onto your vehicles tyre valve. **When connected correctly the gauge will display the current pressure in the tyre. If this is the tyre pressure as stated in your vehicles handbook, you can simply remove the tyre valve connector (7).** Do not start the inflator if the tyre pressure is not displayed or appears to be spurious, please refer to the Trouble Shooting section.

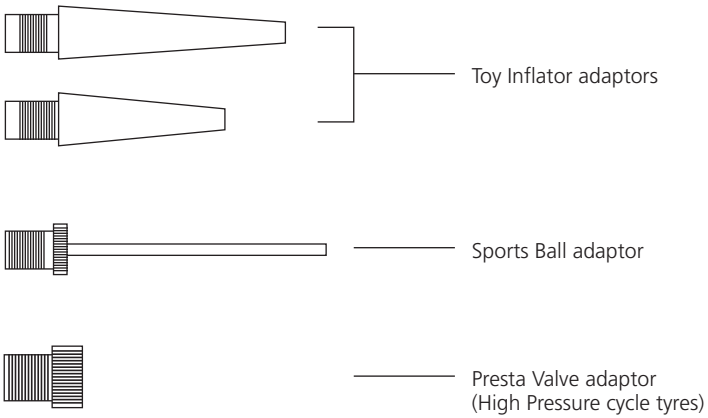
3. If the tyre is over inflated, press the deflation bleed valve button (6) to release air until the gauge shows correct pressure (as specified in your vehicle handbook). This is also useful if you over inflate.

4. Press Power Switch (3) to 'I' and begin inflating your tyre. When you have reached the specified tyre pressure switch off the Power Switch (3) to '0' (unit may show 1 or 2 PSI above actual pressure when running).

5. Remove the tyre valve connector (7) from the tyre valve. Take care when unscrewing the tyre valve connector; ensure NOT to press the deflation bleed valve button (6). Special adaptors are provided to inflate sports balls. To avoid over-inflation, always follow manufacturer's instructions on the items to be inflated.

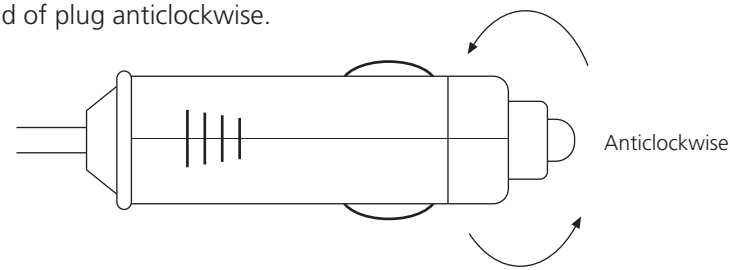
ADAPTORS

Included with your Michelin Tyre Inflator are various adaptors to enable you to inflate other items.

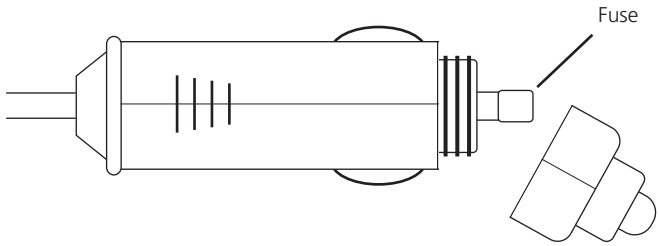


12v POWER PLUG

TO REPLACE FUSE IN 12V PLUG:
Unscrew end of plug anticlockwise.



Replace fuse (Max' 15A) and screw end of plug back on clockwise.



CARE AND MAINTENANCE

- Always read and follow the operating instructions.
- Do not allow your tyre inflator to become wet.
- Do not over stretch the power lead (8) or high pressure air hose (4).

TROUBLE SHOOTING

Gauge does not illuminate **Unit fails to run with switch in 'ON' position**	■ Your car may require the ignition key to be turned to the accessories position.
Power lead/plug becomes hot	■ If power lead is coiled, uncoil to full length. ■ Ensure 12v socket is clean with no debris in it. ■ Ensure 12v plug components are tight and clean.
Gauge appears to read incorrectly or is unreadable	■ When the tyre valve connector is attached, before switching the unit on, ensure the gauge is reading your current tyre pressure. ■ Disconnect from tyre. Remove plug from power source for at least 5 seconds, reconnect to power.
Unit is running but tyre is not inflating	■ Check that the tyre valve adaptor is correctly fitted to tyre valve.
Gauge does not display when tyre valve is connected	■ Ensure tyre valve is correctly connected to the tyre valve adaptor.

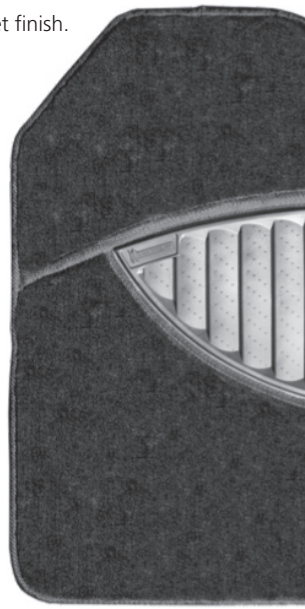
OTHER AUTOMOTIVE ACCESSORIES

WHEEL COVERS
- Integrated Reflective System.
- 2 Designs, available in various sizes.

PROGRAMMABLE DIGITAL TYRE PRESSURE GAUGE
- Range: 5-99PSI.
- White LED flashlight.
- Blue backlight display.
- Rubber grip.
- Storage case.

AIR FRESHENER
- Long lasting fragrance.
- Ideal for car, home or office.
- Self-adhesive base.

CAR MATS
- Rubber or carpet finish.
- Anti slip backs.



HEAVY DUTY RAPID TYRE INFLATOR
- Inflates a fully deflated tyre in under 3 minutes.
- Easy to read pressure / preset / cut-off / accurate to +/-1 (up to 50psi).
- Integrated super-bright LED lights for night use.
- Multi-function pressure sensor displays in PSI, BAR and kPa.

SINGLE BARREL FOOTPUMP
- Analogue gauge accurate to +/-PSI (up to 50 PSI).
- Easy to read dual display shows PSI and BAR.
- 60cm hose for easy connection to tyre valve.
